

How do we strengthen our community image and sense of place? How do we create jobs for the young people of Butere and engage them better in community activities?

## Butere Multipurpose Eco-Park

In 2018 Kakamega County and Butere Sub-County administration office will rehabilitate idle public space and create a multi-purpose eco-park near the newly constructed Lower Butere bus station.

The park will serve as a vivid living room for various kinds of activities attractive to all age groups and sexes. Participatory engagement of youth is included both at the implementation and operational levels of the project, enhancing vibrancy. The park will serve as a platform that brings people together to engage in both sporting and playground activities, productive

waste handling, and handicraft teaching.

All planned activities will be fit to furnish a beautifully landscaped green scenery that will develop over time both in size and content with the change project to come. The landscape is made up of various species of trees, arbors, ponds, picnic spots, and a network of trails where stalls, sports fields, eco water free toilets, and more, will be placed. When the multi-purpose park is complete, it will host various sports and cultural events, public Barazas, and day-to-day operational activities.

## Butere: A green, vibrant and friendly city
