

How can our town make better use of the old market in Ontulili? How can we make it a safer and more pleasant place to use for all our residents – women, men, girls and boys?

In 2018 Meru County Government administration office is working to upgrade the area around two markets in Ontulili: Katheri and Makutano. These market areas are the heartbeat of our young town. Making these vibrant and well-used places will have many benefits to our local economy.

Lighting will be set up to make the markets feel safer during the evening and night, and encourage traders and customers to use these

facilities after dark. Trees will be planted in and around the markets to make the location more beautiful and appealing to use.

These are two simple interventions to make Ontulili a decent place to work for traders, and an enjoyable market to visit for the town's residents. By upgrading the area we hope that more people will be able to use and benefit from our markets, thereby supporting our local economy and local jobs.

Ontulili: A well-planned, managed and economically sustainable town
